**Title**

Establishment of Horizontal and vertical control network

---

**Science Keywords**

Category Land Surface

Topic Topography

**ISO Topic** Topography

**Summary****Abstract**

Horizontal and vertical control network is planned to laid by fixation of Forced Centric Devices over Larsemann Hill Area. These Devices will enable direct installation of GPS antenna over point and reduce vibration and deviation caused by heavy wind and gusts occur while long duration observation. This network will be useful for further mapping works and other scientific activities.

**Purpose**

Establishment of Horizontal and vertical control network by fixation of Forced Centric Devices over Larsemann Hill Area.
