## Title

Southern Indian Ocean coccolithophore data

---

## Science Keywords

Category	Oceans
Topic	Marine Biology
Expedition Year	2010-2011
ISO Topic	Biota

## Summary

---

### Abstract

The dataset contains coccolithophore data collected during the 4th Southern Ocean expedition. Samples were collected between Mauritius and Antarctica in vertical profiles.

### Purpose

This data can be used to study the health of the oceans, distribution of calcareous nannoplankton in the Southern ocean, ocean acidity, ocean alkalinity, and related subjects.
