Title

Establishment of cryophilic cyanobacteria and eukaryotic microalgal collection and exploration for possible biotechnological potentials

Science Keywords

Category	Biosphere
Topic	Cryosphere
Expedition Year	2011-2012
ISO Topic	Biota

Summary

Abstract

The proposed project aims to establish a cryophilic microalgal germplasm, and to explore the biotechnological potentials of these extremophiles

Purpose

Locate, collect, isolate and identify microalgae and to maintain the cryophilic microalgal culture collection
