Title

Bacterial community dynamics in Arctic ecosystem

Science Keywords

Category	Oceans
Topic	Marine Biology
Expedition Year	2018-2019
ISO Topic	Oceanography

Summary

Abstract

To study bacterial community dynamics during specific polysaccharide degradation at physico -chemically contrasting sites in Kongsfjorden. To study heavy metal tolerant bacterial community diversity and dynamics in Arctic ecosystems

Purpose

To study bacterial community dynamics during specific polysaccharide degradation at physico -chemically contrasting sites in Kongsfjorden. To study heavy metal tolerant bacterial community diversity and dynamics in Arctic ecosystems
